

## Project Engineer

### Description

#### COMPANY OVERVIEW:

CREO Industrial Arts is a custom fabricator that has been producing high-end architectural products for over 30 years. We execute the vision of the world's finest architects, experiential graphics designers, landscape architects, and exhibit designers, producing extremely high fit and finish custom products for a wide variety of venues.

From the smallest, most detailed piece to large, multi-story structures, CREO does it all. Every project is different, but what they all have in common is the sophistication of the design and the industry's highest standard of quality.

### Responsibilities

#### POSITION SUMMARY:

The primary role of the Project Engineer is to ensure that projects are executed on time, on budget, and at the appropriate margins. The Project Engineer is the liaison between the client and CREO and must remain constantly engaged with both parties to ensure alignment. The position monitors all phases of the project to ensure the accurate execution of the specifications, details and obligations of the contract are met. The position must also track and prioritize tasks to keep multiple projects moving on schedule through the design, production, and installation processes.

#### ESSENTIAL DUTIES AND RESPONSIBILITIES:

- Use project kick off documents to develop project schedule with critical path.
- Manage and maintain budget for project, including the preparation of the schedule of values, estimate at completion, and monthly billing projections.
- Manage and maintain project schedule, communicating with clients as needed.
- Meet with Technical Design to review scope and schedule for design document development.
- Research fabrication options, subcontractors, creation of submittal samples, mock-ups, and prototypes.
- Perform site surveys and obtain first verification data.
- Prepare RFI's and report the responses to be incorporated in the final shop drawings.
- Prepare transmittal for submittal samples, patterns, and drawings.
- Prepare permit documents, submit for permits, coordinate inspections and archive original signed off documents.
- Contract and coordinate subcontractor services
- Manage change order process.
- Schedule hand off with Production team to review project scope and schedule.
- Monitor production progress.
- Perform QA/QC inspection for production work at 60% completion and prior
